

# UM-I-10.6

## All-in-one IR detection module based on HgCdTe TE cooled optically immersed photovoltaic multi-junction detector

### FEATURES

- Spectral range: 2.0 to 13.0  $\mu\text{m}$
- Frequency bandwidth: DC to 100 MHz
- Integrated TEC controller and fan
- M4 mounting hole
- DC monitor
- Optimized for effective heat dissipation
- Compatible with optical accessories
- Quantity discounted price
- Fast delivery
- No minimum order quantity required

### APPLICATIONS

- Gas detection, monitoring and analysis:  $\text{SO}_2$ ,  $\text{NH}_3$ ,  $\text{SF}_6$
- CBRN threats detection
- $\text{CO}_2$  laser measurements: power monitoring and control, beam profiling and positioning, calibration
- Free-space optical communication
- FTIR spectroscopy
- Medical bacteria identification
- Dentistry

### INCLUDED ACCESSORIES

- 2 pcs of SMA-BNC cable
- 1 pc of AC adaptor

### DEDICATED ACCESSORIES

- OTA optical threaded adapter (p. 155)
- DRB-2 base mounting system (p. 152)

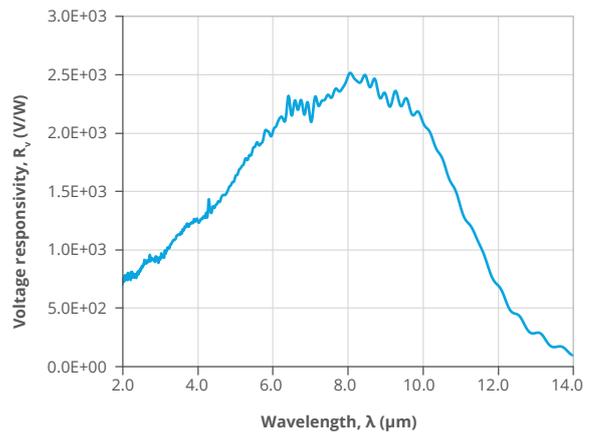

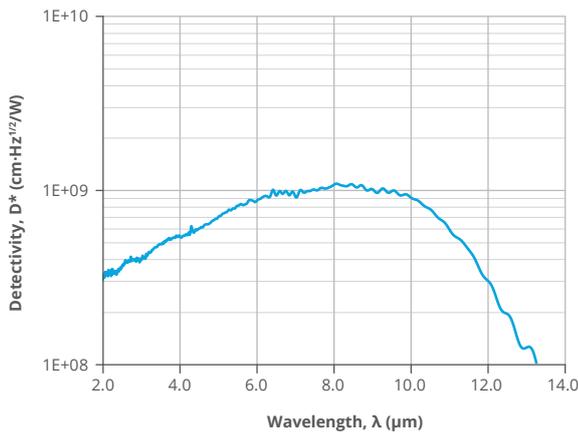

### DETECTION MODULE CONFIGURATION

| Detection module symbol  | UM-I-10.6  |
|--------------------------|--|
| Detector symbol          | PVMI-2TE-10.6-1×1-TO8-wZnSeAR-36 (p. 66)                       |
| Detector type            | photovoltaic, multi-junction                                   |
| Active element material  | epitaxial HgCdTe heterostructure                               |
| Optical area, $A_o$      | 1 mm × 1 mm  |
| Immersion                | hyperhemisphere  |
| Cooling                  | 2TE  |
| Acceptance angle, $\Phi$ | -36 deg.   |
| Window                   | wZnSeAR (3 deg. wedged zinc selenide, anti-reflection coating) |
| Preamplifier symbol      | AIP (p. 126)   |
| Preamplifier type        | transimpedance   |
| Signal output socket     | SMA  |
| DC monitor output socket | SMA  |
| Power supply socket      | DC 2.5/5.5   |

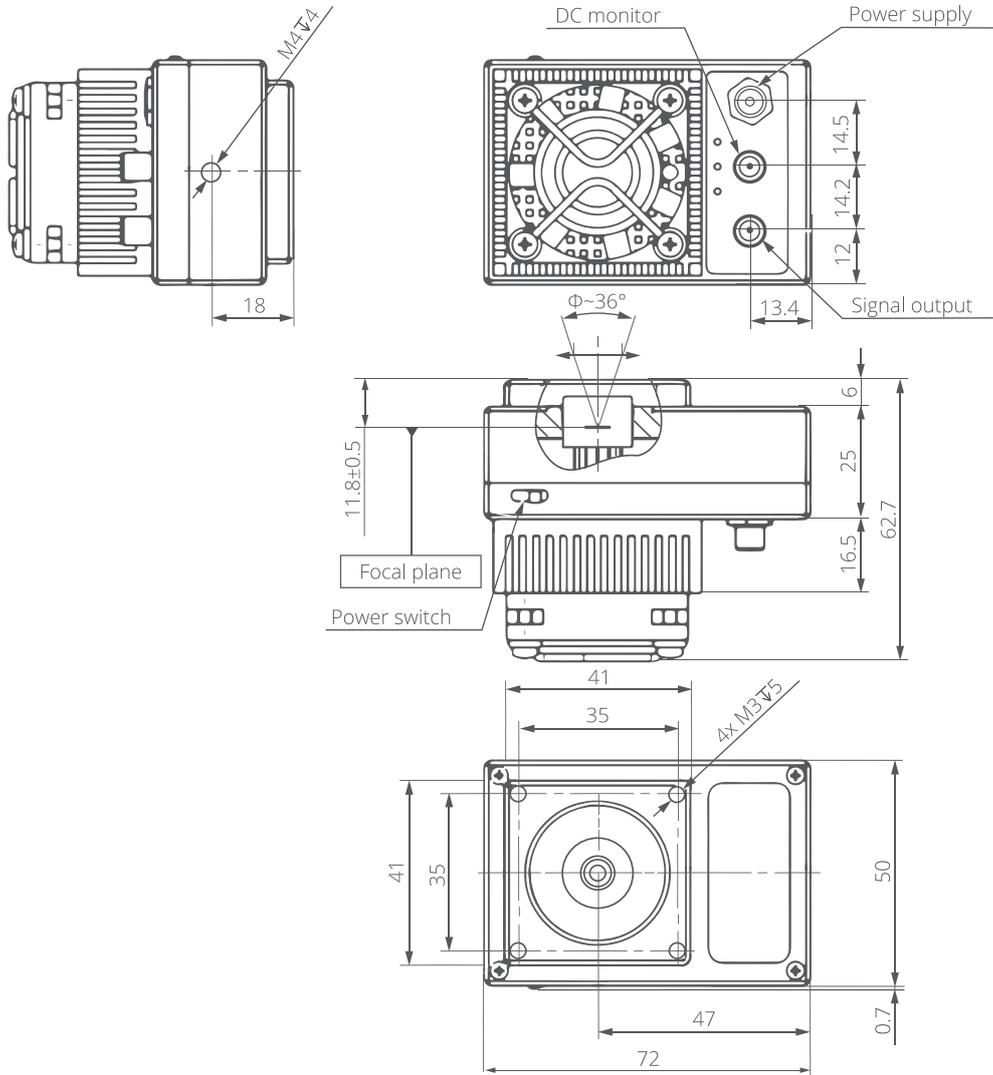

SPECIFICATION ( $T_{amb} = 293\text{ K}$ ,  $R_{load} = 50\ \Omega$ , unless otherwise noted)

| Parameter                                     | Test conditions/remarks   | Value             |                   |           | Unit                                     |
|---|---|-------------------|-------------------|-----------|--|
|   |   | Min.              | Typ.              | Max.      |  |
| Active element temperature, $T_{chip}$        |   | -                 | 230               | -         | K  |
| Cut-on wavelength, $\lambda_{cut-on}$ (10%)   | At 10% of peak responsivity                                     | -                 | -                 | 2.0       | $\mu\text{m}$                            |
| Peak wavelength, $\lambda_{peak}$             |   | 7.0               | 8.0               | 9.0       | $\mu\text{m}$                            |
| Specific wavelength, $\lambda_{spec}$         |   | -                 | 10.6              | -         | $\mu\text{m}$                            |
| Cut-off wavelength, $\lambda_{cut-off}$ (10%) | At 10% of peak responsivity                                     | -                 | 13.0              | -         | $\mu\text{m}$                            |
| Detectivity, $D^*$                            | At $\lambda = \lambda_{peak}$ , averaged over 1 MHz to $f_{hi}$ | -                 | $1.1 \times 10^9$ | -         | $\text{cm}\cdot\text{Hz}^{1/2}/\text{W}$ |
|   | At $\lambda = \lambda_{spec}$ , averaged over 1 MHz to $f_{hi}$ | $3.5 \times 10^8$ | $7.4 \times 10^8$ | -         | $\text{cm}\cdot\text{Hz}^{1/2}/\text{W}$ |
| Output noise voltage density, $v_n$           | Averaged over 1 MHz to $f_{hi}$                                 | -                 | -                 | 350       | $\text{nV}/\text{Hz}^{1/2}$              |
| Voltage responsivity, $R_v$                   | At $\lambda = \lambda_{peak}$                                   | -                 | $2.5 \times 10^3$ | -         | V/W                                      |
|   | At $\lambda = \lambda_{spec}$                                   | $6.5 \times 10^2$ | $1.7 \times 10^3$ | -         | V/W                                      |
| Low cut-off frequency, $f_{lo}$               | DC coupling   | -                 | 0                 | -         | Hz                                       |
| High cut-off frequency, $f_{hi}$              |   | 100               | -                 | -         | MHz                                      |
| Voltage responsivity, $R_v$                   | At $\lambda = \lambda_{peak}$ , DC monitor                      | $2.2 \times 10^2$ | -                 | -         | V/W                                      |
|   | At $\lambda = \lambda_{spec}$ , DC monitor                      | $1.5 \times 10^2$ | -                 | -         | V/W                                      |
| Low cut-off frequency, $f_{lo}$               | DC monitor  | -                 | 0                 | -         | Hz                                       |
| High cut-off frequency, $f_{hi}$              | DC monitor  | -                 | 150               | -         | kHz                                      |
| Output voltage swing, $V_{out}$               |   | -                 | -                 | $\pm 0.7$ | V  |
| Output voltage offset, $V_{off}$              |   | -                 | -                 | $\pm 20$  | mV                                       |
| Power supply voltage, $V_{sup}$               |   | -                 | 5                 | -         | V  |
| Power supply current consumption, $I_{sup}$   |   | -                 | -                 | 1.2       | A  |
| Weight  |   | -                 | 235               | -         | g  |

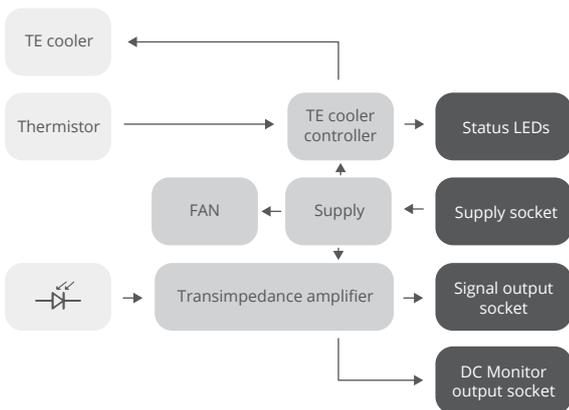

SPECTRAL RESPONSE (Typ.,  $T_{amb} = 293\text{ K}$ ,  $T_{chip} = 230\text{ K}$ )

### MECHANICAL LAYOUT (Unit: mm)

### SCHEMATIC DIAGRAM

### ABSOLUTE MAXIMUM RATINGS

| Parameter                                | Test conditions/remarks                                   | Value     | Unit               |
|--|---|-----------|--------------------|
| Ambient operating temperature, $T_{amb}$ |   | 10 to 30  | °C                 |
| Storage temperature, $T_{stg}$           |   | -20 to 50 | °C                 |
| Humidity                                 | No dew condensation                                       | 10 to 90  | %                  |
| Maximum incident optical power density   | Continuous wave (CW) or single pulses >1 $\mu$ s duration | 2.5       | W/cm <sup>2</sup>  |
|  | Single pulses <1 $\mu$ s duration                         | 10        | kW/cm <sup>2</sup> |

Stresses beyond those listed under absolute maximum ratings may cause permanent damage to the device. Constant or repeated exposure to absolute maximum rating conditions may affect the quality and reliability of the device.
